

General Comments

1	Presenters should be given guidance for font sizes, symbol sizes, etc., often info on slides was too small to see, even from the second row.
2	All around, appreciate timetable and sticking to it, good job. Don't know how this can be reminded, audience members dwindles as day goes by. Good day to meet others.
3	These presentations offered and interesting and informative range of topics while nicely presenting central themes.
4	Very interesting topics. If we pursue this in the future, I think we need to offer them the same days as the technology topics in order to facilitate the mix of people we hoped for. Unfortunately, most of our tech people did not stay and the history folks did not come early.
5	2009 Presentation Ideas / Thoughts: (1.) Understanding Chemistry trends of passive treatment systems. When to flush, when to replace compost or store? When to retrofit or rebuild? Etc.etc. HOW TO INTERPRET THE DATA! What to test, How to test, understanding / interpreting the test? (2.) Increasing the longevity of your passive treatment system. - Methods, ideas. (3.) Mentoring a watershed organization. (4.) Interagency barriers / conflicts? How to overcome the work thru State Water Plans, NPDES, ACT 220, TMDL's, DMR's etc.
6	Have more, shorter presentations
7	Monday field trip was excellent
8	Please use facilities that recycle beverage bottles
9	Too cold
